

# The Asymmetric Global Economy: *Growth, Investment and Public Policy*

Edited by **Christos C. Paraskevopoulos**, York University, Canada, and the Athenian Policy Forum, **Theodore Georgakopoulos**, Athens University of Economics and Business, Greece, and the Athenian Policy Forum, and **Leo Michelis**, Ryerson Polytechnic University, Canada, and Research Fellow, Athenian Policy Forum.

## Advance Acclaim

“While globalization is a force expanding opportunities and efficiencies for business, it also weakens the hold of national governments. This comprehensive collection of technical analyses that support well-founded policy studies provides a vivid picture of governance, both national and global, under stress. Decisions regarding tax, competition, and labor policy, and even public infrastructure spending, increasingly are constrained by considering international repercussions, for instance for FDI. The extent to which national goals of economic development and social justice can be advanced under the new paradigm of global positioning is the book’s most fascinating subject of analysis.”

**George M. von Furstenberg**  
**Robert Bendheim Chair in Economic and Financial Policy**  
**Fordham University, New York**

“The editors have raised a crucial theme overhanging the current move toward greater worldwide economic integration. The perceived asymmetric economic expansion with its unequal impact on various groups within countries and among countries is, in fact, the Achilles’ heel of making further gains through established international institutions.”
