“Taken as a whole, the articles in this volume contribute substantially to our understanding of the key roles being played by banks and other financial institutions in globalization. Those of us who are interested in these subjects owe a debt of gratitude to The Athenian Policy Forum for bringing this publication to us.”

“The papers gathered here suggest a revised proverb: Those who do not learn from the parallels in the recent and remote history of the other countries are condemned to repeat their mistakes and miss their opportunities. We need histories, yes; but also the international comparisons, lessons from our global neighbors, such as the Athenian Policy Forum specializes in providing.”
